

Our latest inventions are highlighted on our new Innovations and Solutions site. Each invention fulfills an important industry need and is the latest in a line of innovative controls that have been developed over the past few years. That kind of inventive thinking – and spirit – means you can expect higher standards. And get higher quality. Call. Ask about our latest inventions. And find out about the complete line of appliance and HVACR controls in the industry. You'll benefit from our belief that invention is 1% inspiration, 99% perspiration. And learn, as we have, that sweating out the details leads to inspiring rewards. WHAT WE DO We are a global design, engineering and manufacturing company that sells product solutions into the white goods industry and leverages this portfolio and technology into adjacent markets and after sales channels. Robertshaw manufactures more than 10,000 sophisticated controls for commercial and home appliances. Primary applications include controls for clothes washers and dryers, dishwashers, refrigerators, electric and gas cooking, ice makers, fluid dispensing, storage water heaters, gas valves for space/central heating, and automotive/off road temperature and fluid controls. Robertshaw Global Headquarters is located in Itasca, Illinois, USA. The company employs over 6,000 employees in 14 countries, has three engineering centers and 12 manufacturing plants.

Products from this brand
