Access valve, 1/4" SAE, 7.5cm copper tube extension

Brand: MahbCool

Category: Spare Parts

MahbCool 1/4" SAE access valve with 7.5cm copper tube extension for refrigerant service ports.

DESCRIPTION

MahbCool's access valve pairs a 1/4-inch SAE brass fitting with a 7.5cm copper tube extension, used to add a charging or service port onto a refrigerant line during installation or repair. The valve body has a knurled brass cap covering a Schrader-style service pin, with the copper tube end left plain for braze or flare connection. Sold as a single valve-and-tube unit, as shown on Mahbcool's own packaging.
