Car AC Blower Motor (Cabin Fan)

Category: Automobile

Cabin blower motor (fan) that circulates air through a vehicle's HVAC system, sold as a generic aftermarket part.

DESCRIPTION

This blower motor, also referred to as the cabin fan, drives air circulation through a vehicle's heating and air conditioning system, pushing air across the evaporator and heater core and out through the dashboard vents. It is listed as a generic aftermarket automobile part. No brand or model number is recorded, so fitment should be checked against the vehicle's original blower motor before ordering.
