Car AC Evaporator Core

Category: Automobile

Replacement evaporator core for vehicle air conditioning systems, listed as a generic aftermarket automobile AC part.

DESCRIPTION

This evaporator core is a replacement component for vehicle air conditioning systems, installed inside the dashboard housing to allow refrigerant to absorb heat from incoming cabin air. It is listed as a generic aftermarket automobile AC part. No brand or model number is recorded for this unit, so buyers should confirm physical fit against their vehicle's original evaporator before ordering.
