Dovercool Run Capacitor (60+6µF)

`Model: 60+6uF`

Category: Spare Parts

Dovercool dual run capacitor, 60+6uF at 450VAC, four-terminal metal can, PCB-free.

DESCRIPTION

This Dovercool run capacitor is rated 60+6 microfarad at 450VAC, 50/60Hz, as printed on its label, and is intended for dual-rated compressor/fan-motor circuits in HVAC equipment. It is a round metal-can capacitor with four spade terminals on top and is marked PCB-free (Class B), per its label and packaging.
