Compressor with external relay/overload box

Brand: Copeland

Category: Compressors

Reciprocating-style compressor supplied with a separate external relay/overload protector box.

DESCRIPTION

This compressor is supplied together with an external relay/overload box, shown mounted separately beside the compressor body and connected by wiring. The compressor itself has a black hermetic welded housing typical of reciprocating units, with a data label on the relay enclosure. It is intended for refrigeration or air-conditioning applications requiring a separately housed starting relay and overload protector.
