Insulated copper refrigerant tube pair, flare-fitted

Brand: Golden Tube

Category: Copper Tube

Factory-insulated copper refrigerant tube pair with flare-fitted brass ends for split AC installation.

DESCRIPTION

Golden Tube's insulated copper refrigerant tube pair supplies both liquid and suction lines pre-joined and factory-insulated for split air conditioner installation. Each end is fitted with a flared brass connection ready for direct coupling at the indoor and outdoor units, and the full length is wrapped in white foam insulation to limit condensation and heat gain along the run. Supplied as a coiled pair for straightforward handling and routing on site.
