MAP-Pro brazing gas cylinder, 400g

Brand: MahbCool

Category: Spare Parts

400g disposable MAP-Pro brazing gas cylinder, rated to 3,600°F, for refrigeration pipe brazing.

DESCRIPTION

This MAP-Pro brazing gas cylinder from MahbCool is a disposable 400g (14.1oz) fuel canister used for brazing and soldering refrigeration copper pipework. Per its label, the gas burns at up to 3,600°F and is marketed as delivering faster heat transfer than propane. It is intended for use only with torches designed for MAP-Pro/MAPP gas and is labeled extremely flammable and pressurized.
