Motorcycle Rear Shock Absorber (Pair)

Category: Motorcycle

Pair of motorcycle rear shock absorbers with red coil springs, grey damper bodies, and rubber-bushed eyelet mounts.

DESCRIPTION

This is a matched pair of motorcycle rear shock absorbers, each with a red powder-coated coil spring wrapped around a grey damper body. Both units have rubber-bushed eyelet mounts at the top and bottom for bolt-through fitment, plus a threaded spring perch for preload adjustment. Sold as a pair so both rear shocks are replaced together.
