Motorcycle Speedometer & Tachometer Gauge Cluster

Category: Motorcycle

Motorcycle speedometer/tachometer gauge cluster with 0-180 km/h dial, 0-12,000 RPM dial, fuel gauge, and indicator lights.

DESCRIPTION

This is a combined speedometer and tachometer gauge cluster for a motorcycle, housed in a black plastic shell with a mounting bracket for handlebar fitment. The left dial reads road speed in km/h up to 180 with a mechanical odometer window, and the right dial reads engine speed up to 12,000 RPM (x1000 r/min). A center fuel gauge and indicator lights for neutral, turn signals, and headlight are built into the cluster face.
