TBSB three-pole rod thermostat

Model: TBSB

Brand: Thermowatt

Category: Heater

Thermowatt TBSB thermostat with a die-cast metal housing, rotary adjustment knob, and capillary sensing tube.

DESCRIPTION

This TBSB thermostat from Thermowatt is housed in a die-cast metal casing, with a brass rotary adjustment shaft on top, spade-style terminal connections, and a flexible copper capillary sensing tube ending in a coiled sensing bulb. The housing carries the THERMOWATT brand plate and an embossed type/rating code. It is used to sense and control temperature in water heaters and similar appliances, wired via its terminal connections.
