TMS three-pole rod thermostat

`Model: TMS`

Brand: Thermowatt

Category: Heater

Thermowatt three-pole rod thermostat with a long rigid brass sensing rod, rated 16A 230V~ / 10A 400V~.

DESCRIPTION

The TMS is a three-pole rod-type thermostat from Thermowatt (Italy), designed to control electric water heaters. Unlike capillary types, it senses temperature along a long rigid brass sensing rod that inserts directly into the tank. The housing carries three flat spade terminals for wiring and is rated 16A at 230V~ / 10A at 400V~, as printed on its label.
